

Customer Journey Map

Date	25 June 2026
Project Name	Smart Lender
Maximum Marks	2 Marks

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Visits the Smart Lender website. • Reads about the project. • Opens the loan prediction form.	• Enters personal and financial details. • Checks the information entered. • Clicks the Predict Loan button.	• Views the prediction result. • Checks whether the loan is approved or not. • Decides what to do next.
Touchpoint <i>What part of the service do they interact with?</i>	• Home page. • Navigation menu. • Project overview.	• Loan application form. • Input fields and dropdown menus. • Predict button.	• Result page. • Loan status card. • Navigation buttons.
Customer Thought <i>What is the customer thinking?</i>	• "This looks simple to use." • "Can I get my loan approved?" • "Let's check my eligibility."	• "I hope I entered everything correctly." • "I wonder what the result will be." • "Will my credit history affect the prediction?"	• "The prediction was quick." • "Now I know my loan eligibility." • "If it's rejected, I should improve my profile."

Customer Feeling <i>What is the customer feeling?</i>	• Curious. • Hopeful. • Interested.	• Focused. • A little nervous. • Excited to see the result.	• Happy and confident if approved. • Slightly disappointed if rejected. • Satisfied because the process was fast and easy.
. Process Ownership <i>Who is in the lead on this?</i>	• Frontend interface (Flask website).	• Flask backend and Machine Learning model process the data.	• Flask application displays the final prediction result.
Opportunities <i>How can we improve this stage?</i>	• Add clearer instructions for first-time users. • Improve mobile responsiveness. • Include a short project introduction.	• Add field Validation. • Show helpful hints for each input. • Display a loading message while processing.	• Explain why the loan was approved or rejected. • Suggest ways to Simprove eligibility. • Allow users to download the result as a PDF.
